A. The outermost garment must be a scrub/uniform garment, including a GHS Gundergear jacket. **The predominant garment that the patient and family see must be a scrub/uniform garment.** (For example, if you are wearing a non-scrub or non-uniform shirt under a scrub jacket, you may not take off your scrub jacket and it must remain buttoned or snapped at all times. This example works for a scrub vest as well.)

**Exclusions:** Attire in sections C, D, and E.

B. Embroidery may:

1. Only be on scrub top or jacket
2. May have the GHS logo in black, white, or corporate colors. May be personalized in corporate colors (blue or green), black or white.
3. Include name, role or both.
  - I. If name is included, it must be identical to your name badge
  - II. If role is included, it must be your current role. If your role changes, you cannot wear the top/jacket until this is also updated.
4. Embroidery does not eliminate the need to wear your name badge.
